

-We reinvented Teak-

Traditional teak is scarce. Ordinary composites fall short. But EcoTeak solves the challenges yacht builders, architects and designers face every day. It combines natural beauty with engineered perfection. All developed and produced in-house, offering guaranteed consistency and quality.

Smarter, cleaner, sustainable yacht decking

EcoTeak delivers the elegance of real teak without the drawbacks. Engineered for durability in the harshest marine environments, it's trusted by leading shipyards worldwide.

Our strengths:

- **Sustainable:**

Oil-free, 70% plant-based, and fully eco-certified.

- **Flexible and custom design:**

Available in nine colors, three caulking options and custom patterns.

- **Reliable supply:**

In-house production, expert installation and dedicated aftersales support ensure long-term performance.

"EcoTeak combines natural beauty with durability. Ideal for those who value style and quality."

Endless design freedom.

EcoTeak is more than decking. It is a platform for creativity. Select from nine elegant colors, ranging from the warmth of classic teak to the sophistication of modern greys.

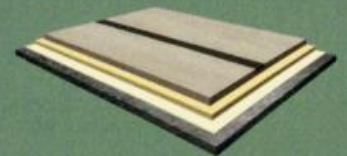

Complete your design with your choice of caulking (black, white, or grey) and custom patterns. Whether you choose a modern look, classic or fully bespoke layouts; with EcoTeak the design possibilities are endless. Your deck becomes a seamless extension of your yacht's design, tailored to perfection.

Engineered for Performance

Beyond aesthetics, the EcoTeak collection is engineered for performance:

- UV- and weather-resistant.
- Anti-slip by design.
- IMO & SOLAS certified for marine decks.
- Low maintenance and easy to repair

Beautiful, practical and sustainable. A smarter alternative to traditional boat decking or any other artificial deck alternative.

Every yacht tells a story. Its design reflects the vision of the architect, the precision of the builder and the personality of the owner. At EcoTeak, we believe that a yacht deck should not only perform in the toughest marine conditions, but also inspire with its beauty.
